

## FLOWERS !!!

Finally we will plant flowers in our garden!

You need to cut your florals into 3.5" X 6.5" rectangles.

I cut 3 ½ inch strips from my fat quarters and sub cut them into 6 ½ inch segments. That is how I did it. You can cut them however you want.

That is the size you need from all your floral scraps!

You need 112 floral rectangles. Lots of flowers in our garden!
