

Let's Start Building Our Path

I hope you have dug out some scraps to sew together for this Flower Garden path. Ours is built with the green grass and the yellow sun to go through our flowers.

We will build it with scrappy four patches. You need 182 - 4 patches – it's a long path...

Cut 2" strips from your greens and yellows.

Sew a yellow strip to a green strip. Strip piece these and make them scrappy!

I put the green strip on the bottom and put the yellow on top, and sew with the right sides together. Continue to chain piece these units. I used 2" strips cut from a fat quarter so they were 18" long.

Cut the strips apart and take to the ironing board. Press seam allowance toward the green.

Now to the cutting mat. I place two pressed strips together, right sides facing each other, (green with yellow) and the seams should butt together. Cut them into 2" sections. I could get enough for 4 four patches from one 18" strip pair. Keep these pairs together. They are ready to sew! Sew them by chain piecing these pairs together. This makes your 4 patch.

3.5" square unfinished.

Clip apart and press. I press this seam open. Yup! Quilt police haven't caught me yet...
