

NOW – You can make these the Jenny Doan, Missouri Star Quilt Co. way.

And quite honestly if I wouldn't have had my strips already cut into 2" strips I might have made them this way. Both ways take a while to piece, just put on some good music and go to it!!

Cut white and blue strips to $3 \frac{3}{8}$ " inches.

Take one strip of each color, put together, right sides facing each other.

Subcut into $3 \frac{3}{8}$ " squares. Keep together in a pair.

Sew all around the outside edge of the square $\frac{1}{4}$ " from the edge.

Cut across this sewn together square diagonally, corner to corner, twice. Be careful not to move the square between cuts. You cut an X across the square corner to corner.

Open and finger press to the dark fabric. Lay out your pinwheel, trim your corners and sew back together. Make sure all your pinwheels spin the same way!

Press this very carefully!! You have biased edges that you are working with and you do not want to stretch them. That is why I finger press the units, no iron pressing until the unit is done. Just my way! Try it – it may help your units not turn out a little wonky!

Measure your pinwheel when finished. It should be $3 \frac{1}{2}$ " square.
